

Carpet Beetle Treatment Preparation Sheet

It is essential that customers properly prepare the areas for successful service delivery. The following steps must be completed before we will perform a carpet beetle treatment.

THESE TASKS LISTED MUST BE COMPLETE BEFORE OUR ARRIVAL:

- Vacuum all carpets and furniture and empty out the vacuum collection container or vacuum bag immediately after.
- Wash all clothing and wool or synthetic cloths, or at least place them in a hot dryer for one hour.
- Move furniture away from the walls (at least 1 foot away) in carpeted rooms. The more carpet we treat the better results.
- You must make arrangements to leave the home for at least 4 hours.
- Remove pets (cats, dogs, birds, reptiles) from inside the home for 4 hours.
- Fish tanks must be covered with a sheet and pumps must be disconnected.
- If anyone with an underlying health condition resides in the home, consult their doctor for health concerns regarding re-entering the home.

AFTER TREATMENT IS COMPLETE:

- DO NOT RETURN FOR 4 HOURS. Once you re-enter, follow these steps:
- Open windows and leave them open for at least 30 minutes to circulate air.
- Do not steam clean carpets for at least 3 weeks after treatment (vacuuming is OK).
- Do not wash or wax floor surfaces for at least 3 weeks after treatment.
- Do not use pesticides of any kind on or around the treated areas, as this will counter Moore Quality treatment efforts and affect service guarantee.
- Do not use cleaning products on or around the treated areas to avoid countering Moore Quality treatment efforts.
- DO vacuum as usual.

Any questions before or after the treatment please don't hesitate to call us at 209-390-1313
